(2) Other Revenues consist of warranty fees, grants and rebates, and other revenues.

Mike Battaglia, President and CEO of Blink Charging, commented, “2025 was defined by our disciplined execution and strengthening the core of our business. We streamlined operations and our cost structure, improved margins and grew repeatable and recurring service revenue, putting Blink on a resilient and scalable path. Blink is now operating as a faster, leaner organization with a durable long-term direction, and we will continue executing with that same focus as we expand our owner-operated DC fast charging network in the most lucrative markets. We’re proud for delivering on our commitments in 2025, and we now look forward to scaling and continuing to drive.”

Michael Bercovich, Chief Financial Officer of Blink Charging, commented, “Throughout 2025, Blink made deliberate structural improvements to our financial profile. We significantly reduced our operating expenses, improved transparency in reporting, and continued optimizing our operational processes to match our scale and goals. The successful and efficient completion of our December 2025 capital raise is a clear reflection of market confidence in the foundation Blink has built, the Company’s long-term direction, and the value of our growing DC fast-charging owner-operated footprint. The raise and its outcome reinforce the credibility of the strategy we’re pursuing and validate our position as a debt-free company committed to accretive investment. With a clean capital structure and a focused investment approach, we are well positioned to scale thoughtfully and sustainably.”

PUBLIC EQUITY OFFERING

In December 2025, the Company completed a \$20 million public equity offering on NASDAQ capital markets, strengthening the Company's liquidity and accelerating investment in Blink's owner-operated DC fast charging footprint. This disciplined approach focuses on building durable, high-value infrastructure rather than maximizing raw installation volume.

BUSINESS OUTLOOK AND GUIDANCE

Based on current visibility, the Company expects continued growth in repeatable charging services and network recurring revenue, supported by improving utilization trends, and expansion of DC fast charging deployments. The shift toward higher quality, repeatable, and recurring service revenue remains a core strategic priority. The Company expects margin contribution from this segment to strengthen as utilization and network density continue to increase.

Product revenue is projected to reflect continued discipline following the transition to contract manufacturing, with a strong focus on capital-efficient opportunities. Blink is committed to scalable and sustainable operational and financial progress. For the full year 2026, the Company expects revenue to be in the range of \$105 million to \$115 million, with gross margins of approximately 35%. The Company also anticipates significantly reduced Adjusted EBITDA losses compared to prior periods. Management expects continued operational improvements to position the Company for profitability.

FOURTH QUARTER AND FULL YEAR 2025 FINANCIAL RESULTS

Blink Charging Co. publicly reports its financial information in accordance with accounting principles generally accepted in the United States of America (“US GAAP”). To facilitate external analysis of the Company’s operating performance, Blink Charging also presents financial information that is considered “non-GAAP financial measures” under Regulation G and related reporting requirements promulgated by the U.S. Securities and Exchange Commission. Non-GAAP measures should be considered in addition to, and not as a substitute for, or superior to, Net Income (Loss) or other measures of financial performance prepared in accordance with GAAP and may be different than those presented by other companies, including Blink Charging’s competitors. EBITDA and Adjusted EBITDA are not performance measures calculated in accordance with GAAP and are, therefore, considered non-GAAP measures. Reconciliation tables are presented above.

EBITDA is defined as earnings (loss) attributable to Blink Charging before interest income (expense), provision for income taxes, depreciation and amortization. Blink Charging believes EBITDA is useful to its management, securities analysts, and investors in evaluating operating performance because it is one of the primary measures used to evaluate the economic productivity of the Company’s operations, including its ability to obtain and maintain its customers, its ability to operate its business effectively, the efficiency of its employees and the profitability associated with their performance. It also helps Blink Charging’s management, securities analysts, and investors to meaningfully evaluate and compare the results of the Company’s operations from period to period on a consistent basis by removing the impact of its merger and acquisition expenses, financing transactions, and the depreciation and amortization impact of capital investments from its operating results.

The Company also believes that Adjusted EBITDA (defined as EBITDA adjusted for non-recurring or non-cash items such as stock-based compensation, acquisition related costs, impairment of goodwill and intangible assets, loss related to underperforming assets of subsidiary, change in fair value related to consideration payable) is useful to securities analysts and investors to evaluate the Company’s core operating results and financial performance because it excludes items that are significant non-cash or non-recurring expenses reflected in the Consolidated Statements of Operations.

Our definition of Adjusted EBITDA and Adjusted EPS may differ from other companies reporting similarly named measures. These measures should be considered in addition to, and not as a substitute for, or superior to, other measures of financial performance prepared in accordance with GAAP, such as Net Loss, and Diluted Earnings per Share.
